

Convergence of the yin curves to $Y_{\text{inf}}(q) = 1 - \Psi(q) e^{-2\pi i(q^2 - 1/16)}$, $q = \text{frac}(T)$

$\sigma = 0.2$: yin paths for $0 < T < 8$

$\sigma = 0.9$: yin paths for $m = 0, 1, 2, 4, 8, 16, 32$
